EMMA HAMLET

Seattle, WA | 646-284-1063 | emmaphamlet@gmail.com | LinkedIn | Portfolio | GitHub

EDUCATION

University of Washington **Expected December 2026**

B.S. Informatics, B.A. Psychology | GPA: 3.94/4.0

Relevant Coursework: INFO 360 (Design Methods), **INFO 380** (Product & Information Systems Management), **INFO 330** (Database & Data Modeling), **CSE 163** (Intermediate Data Programming – Python), **INFO 340** (Client-Side Web Development), **PSYCH 345** (Social Psychology), **PSYCH 209** (Fundamentals of Psychological Research), **PSYCH 315** (Understanding Statistics in Psychology)

EXPERIENCE

Workiva | IT Business Analyst Intern (Internal Product) **May 2026 - Present**

- Discovered through Customer Success interviews that 83% of interviewed users bypassed Gainsight C360 for R360 to access more relevant account information; identified the product adoption gap, proposed a full C360 Summary Page redesign, and launched follow-up research to determine users' highest-value data needs.
- Translated user research into 3 UX concepts and actionable product recommendations, influencing navigation redesign and Copilot integration; presented findings to the CPX Systems team, resulting in selection of the preferred design for beta testing.
- Led a 20-person cross-functional beta of the redesigned C360 experience, coordinating participant recruitment with Customer Success directors and facilitating stakeholder feedback with visibility from VP-level leadership.
- Developed and executed an end-to-end beta testing program, creating a kickoff walkthrough video, self-service Wiki testing hub, standardized UAT scripts, feedback tracker system, Copilot guidance, and dedicated Slack support channel to streamline participant enablement and product evaluation.
- Analyzed beta feedback to inform go-to-market readiness and rollout recommendations; 100% of survey respondents reported reduced call-preparation time, with 75% saving 1-4 minutes and 25% saving 5+ minutes per workflow, alongside 100% positive layout sentiment and 100% support for launch after identified fixes.
- Designed and implemented 15 Gainsight Copilot prompts based on real Customer Success workflows, creating a centralized prompt-library Wiki and demo video for Customer Success teams and directors to support AI adoption and improve workflow efficiency.

@undeniablyemma | **Content Creator & Brand Partnerships** **Jun 2022 - Present**

- Grew a digital audience to 5,000+ followers with a 7% engagement rate, leveraging A/B testing across content formats, messaging, and calls to action to increase average interactions by 20–25%.
- Partnered with brand stakeholders including CVS, Fabletics, Hollister, Drybar, Merit Beauty, and Minute Maid to define campaign objectives, deliverables, and performance metrics.
- Featured in CanvasRebel's "Meet Emma Hamlet," highlighting innovative content creation, community-building, and strategic use of data-backed insights.

SELECTED PROJECTS

University Registration System Redesign | Academic Product Case Study

- Designed an end-to-end product strategy for a university registration platform supporting a 5,000+ concurrent-user scenario, translating user pain points into accessibility-focused requirements, OKRs, and an MVP roadmap using MoSCoW prioritization.

Music Consumption & Mental Health | Python | Notebook

- Analyzed survey data with Pandas and NumPy, applying exploratory analysis, hypothesis testing, and visualization to examine associations between music habits and self-reported mental health.

SKILLS

Product & Research: Product Discovery, User Research, Qualitative/Quantitative Research, Stakeholder Interviews, Requirements Gathering, Roadmapping, Beta Testing, Usability Testing, A/B Testing, KPIs, OKRs, Agile, MoSCoW Prioritization, Stakeholder Management, Survey Analysis
Design & Systems: Gainsight, Copilot Prompt Design, Systems Analysis, Figma, Miro, Wireframing, Prototyping, Jira, Confluence, Salesforce
Technical: SQL, Python (Pandas, NumPy), R, Excel, HTML, CSS, JavaScript, Azure, APIs, Data Visualization, Statistical Analysis
Professional: Communication, Collaboration, Problem Solving, Attention to Detail, Project Management
